

## Accessories

Use with probes to Complement Your Videoscope System

### For Video Borescope

#### Matrix Box

Allows VIPER FASTA LOWE and DXScope videoscopes to work with 2-way wire-less articulation probe (Baitto-WL).

#### Recorder

Extend LOWE functionality to include snapshot and video recording.

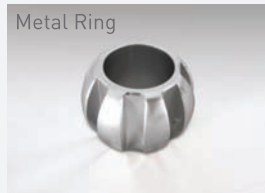

### For Pipe

#### Centering Device

Centering device's external diameter is 50mm, 100mm and 150mm. They can be attached to camera head easily and reliably. The camera head can be centered in the pipe with specific pipe diameter.

Wagon  
ø150mm ~ 300mm

Metal Ring  
ø50

Brush  
ø150 or ø100

### For Insert Tube

#### Extender

An extender helps straighten the probe to inspect areas lower or higher than eye level.

Inspect out of reach areas.

DIAMETER OF PROBE

ø6.0mm

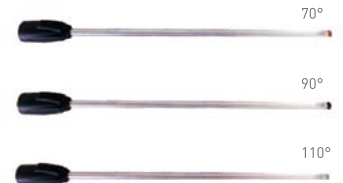

LENGTH

99cm (Ideal for 2m articulation probe)

#### Rotating Mirror

(For 39mm probe front view only)

The rotating mirror allows 360° side-view rotation during inspection.

70°

90°

110°
